PROJECTS

Demo TFT AI: TFT.AI envisions an administrative interface that simplifies the addition of features and steps, making them readily accessible to platform users via an API. This platform serves as a gateway for presenting AI/ML applications, referred to as - Features. It offers a user-friendly interface to access various AI/ML REST API services. Through this platform, end-users can actively engage and explore the outcomes of intermediary processes, known as - Steps. Features: End-to-end functionality comprising different steps in a specified sequential order. (Try it here)

Webotter: This is a chatbot that helps website owners and others integrate a chatbot with just a few clicks, and visitors can use it.

Ekitaab: eKitaab is a free Urdu ePub Book Reader having Nastaleeq font support. NCPUL books can be downloaded and read without any hassle on this reader. (Try it here)

EXTRA-CURRICULAR ACTIVITIES

· 3* coder at LeetCode Profile Link
